Confused about supplements?
Have questions about your health
or that of your loved ones?

Ask our experts...

The human body is an extremely complicated system made up of interwoven functions and organs.

Professionally trained herbalists understand the human body as well as the herbs that promote our body's well-being. Their guidance will help pave a smooth path towards attaining true health. Our herbalists will analyze many aspects of your health: your level of adaptability, level of protection, Yin and Yang balance, primary body functions such as digestion and sleep patterns, lifestyle, 3 Treasures (the 3 primary energies of life,) organs and meridians, etc. They will then custom-craft a tonic program consisting of different herbal formulations to help restore balance to your body.

If you're interested in nurturing your body, mind and soul naturally so as to awaken your true inner power, it's time to consult our licensed herbalists and get a personalized "Radiant Health Consultation." Herbal consultations are complimentary and are available in person and over the phone.
